BECKA GELETO

Bachelor of Arts in Computer Science
1600 Grand Avenue, St. Paul, MN 55105 | 651-434-0971 | bgeleto@macalester.edu
LinkedIn: linkedin.com/in/becka-geleto
GitHub: github.com/beckaberhanu **Portfolio:** beckageleto.dev

Education

Macalester College, St. Paul, MN. **Sep *2018 - Present***
Major: Computer Science ***Cumulative GPA***: 3.68/4.00
B.A Expected*: May 2022*
Relevant Coursework: Software Design and Development, Algorithm Design and Analysis, Object-Oriented Programming and Data Structures **(Java)**, Computational Linear Algebra, Discrete Mathematics, Multivariable Calculus 3
Honors & Awards: Kofi Annan International Scholarship for Academic Excellence, Charles J. Turck Presidential Honor Scholarship

SKILLS

Coding Languages: Python, Java, HTML, CSS, JavaScript.
Tools and Frameworks: Git**,** Django Web Framework, Vue.Js
Design: Adobe Xd, Illustrator, Photoshop

RELEVANT EXPERIENCE

SayKid, Minneapolis, MN ***Sep 2020 – Present***
Software Development Intern

- Tasked with designing and implementing the company's new website using **WordPress.**
- Practicing **Agile software development** in our endeavor to iteratively improve and quickly deliver our products and services.

Macalester College, St Paul, MN ***Sep 2019 – Present***
*Preceptor **(Core Concepts of computer science, Calculus 3)***

- Attend classes and assist students with any difficulties or questions they have about the daily lessons.
- Hold weekly Office hours for students to come by and ask questions related to the course material.
- Assist the professor with grading HomeWorks and In-class activities.

#EarlyBird, *Twitter*, San Francisco, CA ***May 19 – May 24, 2018***
Participant

- One of **35** students selected **from more 1200 applicants** to participate in a five-day interactive program for first-year computer science students from historically underrepresented groups in tech, at **Twitter HQ**.
- Collaborated with 4 other participants and a senior software engineer to design, mock-up and pitch a new feature to a panel of judges. ***Second Place*** *Winner of the #EarlyBird2019 New Feature Pitch Competition.*

PROJECTS

Developer Portfolio Webpage (Independent) ***Aug 2020***

- Developed this website using **Vue.Js** to showcase my CS related skills, experiences and projects to employers.
- Designed using **Adobe XD** and implemented as a Responsive webpage so that it properly fits all varieties of screen sizes.
  - beckageleto.dev
  - github.com/beckaberhanu/DeveloperPortfolioWebsite-VueJs-2020

Maniacal Egg (Group Project) ***Mar – Aug 2020***

- Developed a webapp using **Vue.js** to provide a more intuitive and efficient alternative to our school's course registration process.
  - beckageleto.dev/ManiacalEgg-MyCopy/
  - github.com/beckaberhanu/ManiacalEgg-MyCopy

SwapApp (Group Project) ***Jan – May 2020***

- Built a website to exchange, sell or purchase used textbooks using **Python**, **PostgreSQL** and the **Django Web Framework**.
- Included a customized, built-in messaging service so buyers and sellers can easily communicate without leaving the platform.
  - github.com/beckaberhanu/TextBookSwap

Multilayer Neural Network (Independent) ***Sep – Dec 2019***

- Built a machine learning algorithm capable of classifying the **MNIST dataset** of **60,000** handwritten digits with **92% accuracy.**
- Implemented a **multilayer neural network** with multiple configurable parameters such as architecture, depth, and learning rate.
- Included a simple UI that keeps track of the model's performance at different points during training using the **Java** X-chart library.
  - github.com/beckaberhanu/MachineLearning2

EXTRA-CURRICULAR ACTIVITIES

Macalester Computer Science Club (MacHack) **Nov 2018 - Present**
Member

- Routinely attend and actively participate in weekly club meetings.
- Designed and prototyped an affordable modular maze in preparation for the 2020 Princeton Micromouse Competition
- Contributor on the design and development of the MacHack student club website.
